Richtige Auswahl...

Einige Hinweise zur richtigen Wahl und zum richtigen Einsatz...

- Der Zahnüberstand beeinflusst ganz erheblich die Schnittkantengüte auf der Austrittsseite des Werkstücks. Dies hängt mit dem Austrittswinkel des Zahnes zusammen. Je größer der Überstand, desto kleiner ist der Austrittswinkel und um so schlechter ist die Schnittkantengüte auf der Plattenunterseite. Bei einem Sägeblatt mit positivem Spanwinkel empfehlen wir einen Überstand von ca. 15 mm. Beim Einsatz von Hauptsäge in Verbindung mit Ritzsäge ist der Zahnüberstand der Hauptsäge möglichst hoch zu wählen, um den Standweg der Hauptsäge zu verlängern. Der Weg des Zahnes durch das Werkstück wird kürzer.
- Je dünner das zu bearbeitende Werkstück ist, desto mehr Zähne sollte das Sägeblatt haben. Je dicker das zu bearbeitende Werkstück ist, desto weniger Zähne sollte das Sägeblatt haben.
- Um den Verschleiß zu minimieren, sollte der größtmögliche Vorschub gewählt werden, bei dem die Schnittkantengüte noch gut ist. Dies gilt besonders bei sehr abrasiven Werkstücken.
- Bei der Stahlblechbearbeitung sollte möglichst eine geringe Schnittgeschwindigkeit eingestellt und der Vorschub möglichst hoch gewählt werden um hohe Standwege zu erreichen.

Die Tabelle auf den folgenden Seiten gibt einen ersten Anhaltspunkt zur Auswahl des richtigen Kreissägeblattes für den jeweiligen Werkstoff.

Die genauen Beschreibungen finden Sie auf den folgenden Seiten.

The right choice...

Guidance on selecting the correct blade and machine setting...

- The cleanness of the cut on the exit side of the workpiece is dependent on the 'exit angle' of the saw teeth. Increasing blade elevation reduces the exit angle – and so results in a poorer cut edge. For blades with positive rake angle, a blade elevation of 15 mm is recommended. However, when a pre-scoring saw is employed, the elevation of the main saw can and should be maximised to extend tool life by minimising the path length of the tooth through the workpiece.
- Thinner workpieces require smaller tooth pitch (larger number of teeth). For thicker materials, a larger tooth pitch blade should be selected.
- to minimise wear, feed rate should be as high as the required cut quality will permit. This is particularly important in the case of abrasive materials.
- When cutting sheet steel, cutting speed should be as low as possible, and feed rate as high as possible to achieve maximum tool life.

This table offers preliminary guidance on appropriate tool selection for various materials.

For more detailed descriptions, please refer to the tool specifications on the following pages.

Piano plus

Piano plus

MADE IN GERMANY

Das Piano plus-Programm

... die Steigerung in Schnittqualität und Geräuschdämpfung

Basierend auf den guten Erfahrungen mit den Piano plus-Kreissägeblättern wurde die Lasertechnik nochmals verfeinert und somit die Präzision gesteigert. Die Zähne sind mit hochwertigen Hartmetallsorten in Feinstkornqualität ausgestattet und dem jeweiligen Verwendungszweck angepasst.

Gemeinsames Kennzeichen der GUHDO Piano plus-Kreissägeblätter:

- vibrationsarmer (ruhiger) Lauf durch zahlreiche schwingungsdämpfende Elemente im Stammblatt, dadurch:
- höhere Schnittgüte
- geräuschärmeres Arbeiten und in Verbindung mit der Feinstkorn-Qualität
- längere Standwege

Im Detail zeichnet sich das Piano plus-Programm an den lasergeschnittenen Dehnungsschlitzen durch eine wirkungsvolle GUHDO-spezifische G-Form aus. Die Lasertrennlinien im Stammkörper, die das G in Doppelform enthalten, sind typisch für die geräuschminimierten Präzisions-Kreissägeblätter.

Ab Durchmesser 250 mm erkennt man Piano plus-Kreissägeblätter an dem roten Aufdruck – achten Sie darauf, es lohnt sich!

Piano plus program

... an advance in cutting finish and noise reduction

In response to the excellent results from our quiet-running Piano plus circular saw blades, we have fine-tuned the laser technology to further enhance precision. The teeth are tipped with high quality fine-grained tungsten carbide, suited to their respective applications.

Common characteristics of the GUHDO Piano plus sawblades are:

- low vibration (quiet running) due to numerous anti-vibration elements in the saw plate, resulting in:
- improvement in the cut finish
- quieter working conditions and, due to the new tip grade:
- extended tool life

Piano plus saw blades can be recognised by their laser-cut expansion slots in the form of a „G“ - which is specific to GUHDO.

The laser-cut „double G“ slits in the saw-plate are a typical distinguishing mark of these quiet running precision circular saw blades.

From 250 mm diameter, Piano plus circular saw blades are indicated by the red logo. Look out for it!

Das G-coat-Programm

G-coat-Ausführung

- Die Beschichtung vermindert das Anhaften von Harz und ermöglicht eine leichte Reinigung
- Schutz des Stammblattes vor Wärme, Reibung, Korrosion
- Geräusch- und schwingungsdämpfende Wirkung
- Einfache und schnelle Reinigung des Sägeblattes
- Alle G-coat Kreissägeblätter sind in Piano-plus-Ausführung

G-coat program

G-coat Execution

- The coating reduces the adhesion of resin and allows an easy cleaning
- Protection against heat, friction and corrosion
- Low noise / vibration effect
- Easy and fast cleanable
- All G-coat saws are in Piano-Plus execution

G-coat

Allround-Kreissägeblatt

- Zuschneiden mit einem Hauptsägeblatt
- universell einsetzbar für beschichtete Platten, furnierte Platten, Massivholz, MDF u.ä.
- Holz längs trennen – querschneiden – KF-Platte formatieren in Verbindung mit einem Ritzsägeblatt
- schwingungsarm
- seltener Werkzeugwechsel
- Wechselzahn

Allround-Circular saw blade

- tailoring with one main saw blade: Wood slitting – crosscutting – KF plate formatting relating to one slitting saw blade
- curved tooth (alternate bevel tooth)
- vibrationless
- universal applicable for coated plates, veneered plates, massiv wood, MDF and other
- noise reduced
- longer tool life

GUHDO π-100

...das Sägeblatt für den Allround-Einsatz

- Universell einsetzbares Sägeblatt, passend zu Ritzsägeblatt 2155** DUETT-Set
- Für den wechselarmen Werkzeug-einsatz, Schnitthöhe bis 60 mm
- Materialabhängige Wahl von Drehzahl und Sägeblattüberstand
- Zuschneiden mit einem Hauptsägeblatt: Holz Längstreppen – Querschneiden – KF-Platte formatieren in Verbindung mit einem Ritzsägeblatt
- Wechselzahn

Vorteile:

- schwingungsarm
- seltener Werkzeugwechsel
- universell einsetzbar für beschichtete Platten, furnierte Platten, Massivholz, MDF u.ä.
- geräuschgedämpft
- verlängerte Standwege

GUHDO π-100

...the allround circular saw blade

- universal applicable saw blade fitting for slitting saw blade 2155** DUETT-Set
- for the change reduced tool input, cutting height up to 60 mm
- material dependent choice of speed and saw blade spigot
- tailoring with one main saw blade: Wood slitting – crosscutting – KF plate formatting relating to one slitting saw blade
- curved tooth (alternate bevel tooth)

Advantages:

- vibrationless
- rare tool change
- universal applicable for coated plates, veneered plates, massiv wood, MDF and other
- noise reduced
- longer tool life

HW-Piano plus Rip Saw Blade

- For ripping- and cross-grain cutting, principally in solid wood. Also for trimming wood board materials, single-side veneered or single side plastic coated
- Alternate bevel tooth (curved tooth)

G-coat-Ausführung

- Die Beschichtung vermindert das Anhaften von Harz und ermöglicht eine leichte Reinigung
- Schutz des Stammblattes vor Wärme, Reibung, Korrosion
- Geräusch- und schwingungsdämpfende Wirkung
- Einfache und schnelle Reinigung des Sägeblattes
- Alle G-coat Kreissägeblätter sind in Piano-plus-Ausführung

G-coat Execution

- The coating reduces the adhesion of resin and allows an easy cleaning
- Protection against heat, friction and corrosion
- Low noise / vibration effect
- Easy and fast cleanable
- All G-coat saws are in Piano-Plus execution

HW-Piano plus Kappkreissägeblatt

- Für Querschnitte in naturfeuchtem und trockenem Massivholz weich und hart.
- Für Kapp- und Pendelkreissägen.
- Wechselzahn negativ

= »Piano plus« – geräusch- und schwingungsarme Ausführung / low noise/vibration

HW-Piano plus Fine Cut Saw Blade

- For cleanest cut in veneered boards, for cross and mitre cuts in solid wood, MDF, chipboard, plywood, glued laminate, veneers and beading
- For use on bench and panel-sizing saws, trimming and mitring saws and hand-held circular saws
- Alternate-bevel tooth, 40° bevel angle

2195 HC High Cut

HW-Piano plus Fine Cut Saw Blade

- to cut woodpieces with larger thickness up to 20 – 80 mm with low forward feed. For cross and mitre cuts in fibrous materials like massiv wood, plywood and glue laminated wood and multplex
- for cleanest cut in veneered, foil-coated or paper-coated materials. Applied very good for light-weight building slabs.
- For use on bench and panel-sizing saws, trimming and mitring saws and hand-held circular saws
- Alternate-bevel tooth, 40° bevel angle

2196 HCL

2137.303.33 = DH Brillant

HW-Piano plus Point-Hollow Saw Blade

- For clean cuts in double-side plastic coated board materials
- For use on bench saws and vertical panel-sizing saws
- Point-hollow tooth

2138 HDFFN »EXCALIBUR«

HW-Dachhohl-Flach-Flachzahn Kreissägeblatt HDFFN

- Für beidseitig kunststoffbeschichtete Plattenwerkstoffe, folienbeschichtete Spanplatten, Sperrholz, furnierte Spanplatten, und weitere Plattenwerkstoffe mit empfindlichen Beschichtungen wie Trespa oder Max-Platte.
- Einzusetzen auf vertikalen Plattenaufteilsägen, Tisch- und Formatkreissägen

Vorteile gegenüber den normalen Dach-Hohlzahn-Sägeblättern!

- Günstigerer Austrittswinkel der Zähne durch negativen Spanwinkel
- Erhöhte Schnittqualität durch effektiv höhere Zähnezahl
- Hervorragende Eigenschaften bei Gehrungsschnitten
- Durch den negativen Spanwinkel ergibt sich eine wesentlich kompaktere Zahnform, die im Gegensatz zum positiven Spanwinkel verschleißfester ist.
- Dachhohl-Flach-Flachzahn negativ
- Piano plus Ausführung

HW-Point-Hollow-Flat-Flat Tooth Saw Blade HDFFN

- For double side plastic coated board materials, foil-coated chipboard, plywood, veneered chipboard and other boards like 'Trespa' and 'Max-board'
- For use on vertical panel sizing machines and bench saws

Advantages against standard Point-Hollow-Saw-Blades

- Favourable exit angle due to negative teeth
- Raised cutting quality due to effective higher number of teeth
- Excellent cutting results of mitre cuts
- Extended tool life due to negative cutting angle
- Point-Hollow-Flat-Flat-Tooth negative
- Piano plus low noise/vibration

HW-Kreissägen-Verstellnuter

GUHDO bietet eine einfache und preisgünstige Lösung für Formatkreissägemaschinen, wenn es um die Erstellung von Nuten in unterschiedlichen Breiten geht.

- Durch Anpassung der Spanraumgeometrie und durch zusätzliches Anbringen von 2 Nebenlöchern (10 mm TK 60 mm), die um 1/2 Zahnabstand versetzt angebracht wurden ist es möglich, mit Standard Kreissägeblättern als Verstellnutfräser in einem bestimmten Bereich zu arbeiten.
- Mittels Ringsatz kann die Schnittbreite verändert werden.
- Die Sägeblätter können natürlich auch einzeln zum Schneiden von Massivholz genutzt werden.
- Zur Verfügung stehen 2 Sägeblatt Typen.
- Für Längsschnitte in naturfeuchtem Massivholz weich und hart
- Einzusetzen auf Formatkreissägemaschinen
- Flachzahn mit großem Spanraum

HW Adjustable Grooving Saw

GUHDO offers an easy and budget-prices solution for panel sizing saws, if the creation of different groove width is desired.

- By adjusting the chip space geometry and two additional pin holes (2/10/60), it is possible to use a standard saw blade as adjustable groover now!
- Diversify the cutting width with ring sets
- Saw blades can still be used separately to cut solid wood
- 2 different types are available
- For ripping in unseasoned solid soft- and hardwood
- For use on panel sizing saws
- Flat tooth with large chip space

HW Gang Saw Blade

- For ripping unseasoned solid soft- and hardwoods
- For use on single and double shaft gang-saws
- Flat tooth with chip limiters and 2 HW tipped chip clearance guides

2015 LFM

HW-Vielblatt-Kreissägeblatt

- Für Längsschnitte in naturfeuchtem Massivholz weich und hart
- Einzusetzen auf ein- oder doppelwelligen Vielblattkreissägen für große Schnitthöhen
- Flachzahn mit 2 HW-bestückten Führungsleisten und 2 HW-bestückten Räumerschlitzen

Vorritz-System für Formatkreissägemaschinen

- Die kostengünstige Alternative besteht aus jeweils dem GUHDO-Aufnahmeflansch und dem GUHDO-Ritzsägeblatt.
- Problemloses und zeitsparendes Einstellen der Schnittbreite ohne den Einsatz von Zwischenringen.
- Das Anpassen der Schnittbreite (2,8 – 3,6 mm) des Ritzwerkzeuges an die des Hauptsägeblattes erfolgt stufenlos.

5055 Ritz Quick

Ritz Quick

- Ritz Quick – nie mehr Schätzen beim Einstellen des Ritz-Sägeblattes.
- Das patentierte System erlaubt es, die Breite mittels Scala einzustellen – ohne nachmessen, ohne Zwischenringe oder lästige Montage/Demontearbeiten.
- Einfache Einstellung
- Passend zu den meisten Maschinen
- Passend zu Hauptkreissägeblättern
B = 2,8 – 3,6 mm
- Spart Zeit und Geld

Ritz Quick

- Ritz Quick takes the guesswork out of adjusting and re-adjusting scoring saw blades.
- The system's patented adjustable scoring, eliminates the need for spacers, endless measuring, reassembling, testing and adjusting to obtain the required width.
- Adjusts easily
- Fits most machines
- Fits all blades in the width of 2.8 – 3.6mm
- Saves you time and money

| K | conical flat tooth |
| K/W | conical-alternate bevel tooth |
| ES | single top bevel tooth |
| V | adjustable |

These saw blades are listed according to diameter, bore and number of teeth.

2100 Duett

HW-Kreissägeblatt-Set im Holzetui

- Für Fertigschnitte in beidseitig beschichteten Span-, MDF- oder sonstigen Werkstoffplatten
- Einzusetzen auf Formatkreissägen mit Vorritzaggregat zur Aufnahme von Ritz-Kreissägeblättern mit 22 mm Bohrung
- Die Schnittbreite (3,3 mm) der Wechselzähne vom Ritz-Kreissägeblatt ist um 0,1 mm größer als die des Hauptkreissägeblattes

Vorteile des einteiligen Ritz-Kreissägeblattes im Duett-Set

- bessere Standzeit durch Feinstkorn-Hartmetall
- besserer Planlauf durch stabileres Stammblatt
- schnellste Einstellung, da passend zum Haupt-Kreissägeblatt
- gleiche Ritzbreite auch bei gewölbten Platten

HW Circular Saw Blade Set in Wooden Case

- For clean cuts in double side coated chip board, MDF or other board materials
- For use on panel sizing saws with pre-scoring unit to accept scoring blade with 22 mm bore
- The kerf (3.3 mm) of the alternate bevel tooth scoring blade is 0.1 mm greater than the kerf of the main saw

Advantages of the one-piece scoring saw in Duett-Set

- better tool life from finest quality tungsten carbide
- better true-running from the stable tool plate
- fastest set-up time without adjustment to main saw
- continuous score width even in warped board

* im Holzetui / in wooden case

2101 VPS

VERTICAL POWER SAW

Die neue Werkzeugkombination zum Haupt- und Ritzsägen – die Vertical Power Saw – VPS bietet folgende Vorteile:

- doppelte Standzeit
- weniger Hartmetallzähne, einfache Nachschärfung
- weniger Verharzung durch spezielle Schneidengeometrie
- schneller Set-Werkzeugwechsel ohne Einstellung der Maschine
- keine Plattenhinterlegung zum Standzeitende hin
- kostengünstiger Qualitätslösung „Made by GUHDO“
- Werkzeugsatz wird im hochwertigen Holzetui geliefert

Hinweis:
Haupt- und Ritzkreissägeblatt als Satz zum Schärfdienst geben!

Die neue Werkzeugkombination zum Haupt- und Ritzsägen!

VERTICAL POWER SAW

New tool solution for vertical panel sizing saws with scorer. With the VPS – Vertical Power Saw – from GUHDO for a clean cut. Advantages

- extended tool life
- less teeth therefore less grinding costs
- special cutting geometry
- fast tool set change possible without machine adjusting
- supplied in a high class wooden box
- economic quality solution „Made by GUHDO“

Attention:
It is recommended to grind main saw and scoring saw at the same time.

The economical cutting solution!

2520 HS

HS-Vollstahl-Kreissägeblatt

- Grundauführung dampfangelassen für Eisen
- Für langsam drehende Maschinen (ca. 20 – 80 min⁻¹)
- Kurzfristig lieferbare Ausführungen: Ab D=400 mm jede Verzahnung kurzfristig lieferbar. 3 und 4 mm Zahnteilung in BW-Verzahnung
- ab 5 mm in HZ-Verzahnung

HS Steel Saw Blades

- Basic form steam treated for iron.
- For low speed machines (n = 20 – 80 min⁻¹)
- Short delivery time for blades from D = 400 mm and bigger. 3 and 4 mm tooth pitch in BW tooth shape
- from 5 mm onwards in HZ tooth shape

Zahnform BW / tooth shape BW

Zahnform HZ / tooth shape HZ

CV-Vollstahl-Kreissägeblatt

- Falls keine Angaben zur Zahnform erfolgen, liefern wir bis D = 350 mm Zahnform B und ab D = 400 mm Zahnform A.
- Zahnform A: KV = Grobzahn
- Zahnform B: NV = Feinzahn

CV Steel Saw Blade

- Unless otherwise specified, we supply tooth form B up to D = 350 mm; tooth form A from 400 mm
- Tooth form A: KV = coarse tooth
- Tooth form B: NV = fine tooth

Bandsägeblätter aus hochwertigem Qualitätsstahl

- fein poliert, geschränkt und geschärft, in Rollen von 100 m. Preis pro Meter
- Stärkenempfehlung:
 bis Länge 3.000 mm: Stärke 0,4 mm
 5.000 mm: 0,6 mm
 6.000 mm: 0,7 mm
 über 6.000 mm: 0,8 mm
- Lieferbar sind auch geschweißte fixe Längen, immer geschränkt und geschärft. Mindestbestellmenge 100 Meter

Bandsaw Blades in High Quality Steel

- Polished, set and sharpened, in 100 m coils. Price per metre
- Recommended thickness:
 up to 3000 mm: 0,4 mm thick
 5000 mm: 0,6 mm
 6000 mm: 0,7 mm
 over 6000 mm: 0,8 mm
- Also available joined in fixed lengths, sharpened, set and ready for use. Minimum quantity 100 meter

Bandsägeblätter aus hochwertigem Qualitätsstahl

- endlos geschweißt
- Preise in Euro pro Blatt für fertig geschweißte fixe Längen (geschränkt + geschärft + endlos geschweißt)
- Je Sorte (gleiche Länge, gleiche Breite, gleiche Stärke, gleiche Zahnung) mindestens 3 Blätter.
- Anfertigung einzelner Blätter nicht möglich.
- Die Zahl hinter der Zahnform ist die Zahnweite in mm (z.B. A 9 = Form A, 9 mm Zahnweite)

Stärkenempfehlung:

| | |
|-------------------|---------------|
| bis Länge 3000 mm | Stärke 0,4 mm |
| 5000 mm | 0,6 mm |
| 6000 mm | 0,7 mm |
| über 6000 mm | 0,8 mm |

Band Saw Blades High Quality Steel

- endless welded
- Price in Euro/each, for finished welded blades (set, sharpened and endless induction welded)
- Minimum order 3 per size (same length, width, thickness and tooth configuration)
- Single piece order not possible.
- The number following the tooth form is the tooth pitch in mm (i.e. A 9 = form A, 9 mm pitch)

Thickness:

| | |
|----------------------|------------------|
| Length up to 3000 mm | thickness 0,4 mm |
| 5000 mm | 0,6 mm |
| 6000 mm | 0,7 mm |
| over 6000 mm | 0,8 mm |

HW-Segment-Zerspaner 200 mm Durchmesser

- Zum ausrissfreien Formatieren von Plattenwerkstoffen bei gleichzeitiger Zerspanung der Säumlänge
- Einzusetzen auf Doppelendprofilern und Kantenbearbeitungsanlagen
- n.max. 8.000
- Preise ohne Spannbüchse

HW Segment Hogger, 200 mm Diameter

- For tear-out free sizing of board materials, simultaneously shredding the offal
- For use on double-end tenoners and edge trimmers
- n.max. 8000
- Without mounting sleeve
